

## **LeverX Joins Google Enterprise Partner Program**

Mountain View, CA, October 12, 2009 – LeverX, Inc., a full-service systems integrator, SAP® Service Partner and approved vendor, today announced it has joined the Google Enterprise Partner™ program, to extend the power of Google Apps™ across the enterprise and help customers get more value out of their Google Enterprise deployments. LeverX will bring to market products and services to extended Google Apps and other Google technologies that integrate with SAP business solutions allowing companies to further leverage their use of Google's cloud computing platform and their extensive SAP business data and processes within their Enterprise and across their partners and supply chain environment.

“The Google Enterprise Partner program will help us build and deliver Google Apps to users of SAP, the world's leading provider of business software,” said Alan Mendel, Vice President of LeverX. “Google Apps Premier Edition offers a broad set of powerful APIs that enable us to integrate Google's cloud computing platform and growing list of collaborative applications with SAP's backend business solutions such as Enterprise Resource Planning, Supply Chain Management, Customer Relationship Management, Product Life-cycle Management, and Supplier Relationship Management.”

Google Apps brings simple, powerful communication and collaboration tools to organizations. With Google Apps, users can use tools such as Gmail™ webmail service, Google Calendar™ calendaring service, and Google Docs™ program, Google Sites™ web application, and Google Video™ for business on their own domain to work together more effectively. Best of all, it's all hosted by Google, so there's no hardware or software to download, install or maintain.

“Google is excited to have LeverX as a partner in the Google Enterprise Partner program. We're looking forward to LeverX extending and enhancing Google Apps by providing customer-specific applications that integrate to our customer's corporate SAP business solutions,” said Scott McMullan, Google Apps Partner Lead for Google Enterprise.

LeverX has developed a number of prototype applications leveraging Google Apps and SAP within a transparent collaborative environment. “SAP customers have expressed great interest in bringing together their cloud computing vision and their back-end SAP business solutions infrastructure to optimize and automate business processes across their extended enterprise,” said Dr. Victor Lozinski, CEO of LeverX. “We are excited about the business potential to support this growing market demand and working collaboratively with early adopters to define, develop and implement cost effective collaborative Google Apps solutions that yield quick and broad business benefits.”

The Google Enterprise Partner program includes developers, consultants and independent software vendors that provide value-added services for Google enterprise products.
