

GO FASTER WITH IPS

Integrated Process Solution

- **SAP add-on to simplify business processes via workflow enablement**
- **Allow business users to create and manage workflows easily**
- **Reduce time and effort to develop and maintain processes**
- **Simplicity and agility through a rapidly deployable solution**
- **Build process templates with simple building block approach**

All companies face the same challenge today: How to accomplish more with fewer resources, greater agility, better accuracy, and full traceability and transparency. Furthermore, your business processes need to be integral to your business system and leverage your investment in SAP. The LeverX Integrated Process Solution (IPS), leveraging client experiences, enables your Business Users to create and maintain business process workflows that meet their needs today and tomorrow. Manage processes for documents, product change, material masters, BOMs and support many additional SAP objects from logistics, sales, procurement, quality, assets and key business processes.

Deploy lean standard processes

- Automate enterprise processes driven by defined business rules
- Enable business users to define and modify workflows without IT support costs
- Define template based process workflows for rapid deployment and adoption
- Deliver consistent results and quickly adapt your processes to meet changing needs
- Reduce or eliminate manual interventions, administrators and excess meetings
- Provide real-time visibility to processes

Deliver real business benefits

- Ease of use allows business users to define and maintain workflows increasing productivity and reducing support costs
- Limited learning curve provides faster deployment and increased adoption
- Drive standard enterprise processes mitigating product and process risks
- Process templates and mass agent change reduce oversight and maintenance costs
- Decision logic improves quality and shortens process execution times
- Leverage your investment in SAP, automate processes & consolidate systems

Capability highlights

- Intuitive user interface simplifies use and training for business users
- Supports many SAP objects and SAP user interfaces (SAP GUI, NWBC, & Fiori)
- Intelligent selection of workflow and participants based on SAP object attributes
- Decision based actions drive workflows and supports conditional and parallel paths
- Visual workflow clearly identifies process status and phase
- Model complex processes with drag-n-drop
- Automate SAP system activities
- Generate email notifications & approvals, generate PDF reports & workflow tickets
